FULL-STACK DEVELOPER

Orlando, FL • abe.raise@gmail.com • needthisdone.com • github.com/AbeJitsu • linkedin.com/in/weneedthisdone

Over 25 years working with technology in business environments, shipping production software since 2023. I design systems that work, from AI automation to scalable architectures. The engineers I respect most never stop sharpening their tools, and neither do I.

Before tech, I led a five-person medic team in the Army and earned three promotions at Toyota over seven years.

What's stayed consistent: I stay calm when things break, I explain technical stuff so it makes sense the first time, and I follow through on what I say I'll do.
